

Obama - President of NO CHANGE!

In 2003, General Motors developed a working hydrogen fuel cell vehicle. It was shown on 60 Minutes II in April 2003. At that time the government agreed that with General Motors having invested a billion dollars of their own money, the government would help bring the vehicle to market ([http://www.c-span.org/executive/transcript.asp?cat=current&code=bush\\_admin&year=2003](http://www.c-span.org/executive/transcript.asp?cat=current&code=bush_admin&year=2003)).

However, in 2009 Obama and his appointed energy secretary Steven Chu cut \$100 million from the hydrogen fuel cell program in fiscal year 2010. No matter that America needs Hydrogen technology. So, America will still be under the control of OPEC and still producing carbon dioxide in large quantities.

NO CHANGE!

Obama then goes to The G-20 summit, prostrates himself before the King of Saudi Arabia. If he kissed the Saudi King's ring or just bowed, does not matter. "Kissing hands is alien to our values and morals, and is not accepted by free and noble souls, it also leads to bowing, which is a violation of God's law. The faithful bow to no one but God." King Abdullah Bin Abdul Aziz (September 12, 2005). So, Obama does as he pleases, no matter what anyone else believes.
